Brief History of DABEC

DABEC was incorporated late 1993 and we opened our doors early 1994 in Kendallville, Indiana. At that time we had three engineers, one who also doubled as a surveyor, and a part time secretary. Our client base and variety of projects continued to grow so we moved to the south side of Auburn in 2007. Being closer to Fort Wayne and more available to I-69, has provided the base of operations necessary to meet our client's diverse needs. Our experience is quite broad ranging from residential, commercial, and industrial development to municipal projects, area wide studies and master planning, to virtually every type of surveying application. We have designed, engineered, permitted, construction staked, and provided construction management services on over 16,000 subdivision lots in our region. We are very thankful for a loyal client base that has challenged us to remain on the cutting edge of technology with our office and field equipment as we fulfill their engineering and surveying needs.

Problems Solved - Projects Delivered - Promises Kept
